December 2014 Construction  
 September 2013 Design

#### E.L. Robinson's Role

Master Planning  
 Surveying  
 Layout Design  
 Landscape Architecture  
 Grading and Drainage  
 Bidding  
 Construction Administration

Howells and Baird, Inc. hired E.L. Robinson Engineering to design the replacement structure for The Washington Street Bridge over Cherry Valley Run for the Village of Leetonia in Columbiana County, Ohio. Providing access to the southern end of the village, the existing structure was replaced with a single span 3'-10" non-composite box beam on stub abutments. In order to use the ODOT simplified bridge process, the proposed abutments were built behind the existing abutments to keep construction out at Cherry Valley Run.
