

## Woodsfield Long Term Control Plan Phase III

### Monroe County, Ohio

Client: Village of Jewett

Contact: Dwight Busby, Mayor (740) 946-1471

#### Key Personnel:

Jack Ramsey, PE (PM)  
 Bob Allen (FM)  
 Shawn Fore  
 Michael Hodges  
 Jon Thaxton

#### Project Cost:

\$3.32 Million Construction  
 \$3.32 Million Design

#### Year Completed:

August 2020 Construction  
 January 2018 Design

#### E.L. Robinson's Role

Prime Consultant  
 Planning & Funding  
 Acquisition  
 Wastewater Design  
 Construction  
 Management/Inspection

Ohio EPA required the village to separate their sanitary sewer and storm sewers. E.L. Robinson Engineering is assisting the village in completing Phase 3 of the Long- Term Control Plan. ELR staff provided monthly reports on the status of the project during the planning and design phases. The village used these reports to communicate updates to the Ohio Environmental Protection Agency. The project scope includes installation of dedicated storm sewers consisting of approximately 5,340 linear feet of gravity storm sewer pipe ranging from 6-inch to 48-inch in diameter, 51 catch basins and all necessary appurtenances. The project scope also includes installation of new sanitary sewer lines consisting of approximately 2,480 linear feet of gravity sewer pipe, 22 manholes and all necessary appurtenances as well as installation of an automatic self-cleaning bar screen, a roof over the existing sludge drying beds at the wastewater treatment plant, purchase of a skid steer, GPS unit and utility billing software. This project included large diameter bore of 60-inches.

The project is estimated to cost \$3,326,280. The project received \$500,000 in RPIG-CDBG funds, ARC funds in the amount of \$250,000, USDA-Rural Development grant \$1,067,000, USDA-Rural Development loan \$1,176,000 and Ohio Water Development Authority in the amount of \$333,280.
